King of Utah-Clean-Up in the Klondike. HOUGHTON, Mich. April 27 .- Navigation pened at the copper country ports this week. ough Lake vessels are not yet running regularly. The opening found the wharves of the smelters nearly bare of copper, which has been rushed forward by mixed rail and lake routes luring the winter at an average cost of \$8 a ton greater than the cost of shipment by water as far as Buffalo. The Calumet and Hecla has stored about the usual amount of mineral rough copper as it comes from the stamp heads-for summer shipment to the Buffalo smelters, but otherwise there is very little copper in sight in this district.

The Isle Royale mill was to have been started on May 1, but the opening has been postpoped until May 15. A considerable appreciation in the price of shares has been brought about by the anticipation of a favorable showing when the mill starts. Some experts believe that the Isie Royale will return a scant 1 per cent, of refined copper, but because of the equipment and the thorough manner in which the mine has been opened a profit will be made from a net product averaging less than 1 per cent. The mine is capable of making a much higher average, but modern methods and powerful machinery enable the management to handle a large tonnage so cheaply that rock running as low as one-half per cent -ten pounds of ingot copper to the ton of rock as broken-can be handled at a profit in some instances. The tendency of all of the mines is to treat lower grade rock from year to year, and rock that was absolutely worthless ten years ago is now highly valuable. This condition to brought about almost equally by the great reduction in mining and milling costs and the appreciation in the price of the metal.

The new six-stamp mill of the Calumet and Hecla is rapidly taking shape and will be in commission earlier than had been hoped. This mill is to treat the amygdaloid rock taken from the Osceola lode on Calumet and

Work on the new mill of the Osceola is being rushed. The percentage of rock taken from the Osceola mine proper was very low last season, but is now showing a gain.

With the completion of the present in-stallation of new hoisting machinery at the Atlantic, that mine will be enabled to secure a larger production than ever before, and will also cut down the cost of production. The Atlantic has made a great deal of money in the past five years, the bulk of which has been put back into the mine in the shape of betterments, and the mine was never in as good shape as at the present time.

About 15) tons of mohawkite, worth \$140 to \$15) a ton, net, has been barrelled, at the Mohawk mine, awaiting shipment, Developments in the so-called "west lode"

of the Quincy and Franklin mines have not been as favorable of late as was anticipated from initial openings.

Hubbard, in charge of the Champion mine of the Copper Range company, will devote some attention to opening the fissure vein of chalcocite which was uncovered accidentally last season. The vein is merely a parrow seam, but chalcocite or copper glance is by far the richest ore of copper, and in view of the wonderful developments result-

rein.

Recent developments at the Arnold show a fissure of considerable promise, and it is noned that the extension of the celebrated Owl Creek fissure has finally been located. It was from this fissure that the Copper Falismine, now a part of the Arnold, earned dividends of \$100,000.

The Victoria will explore its property with diamond drills. The diamond drill is being used far more extensively in this district than ever before.

Albert C. Krause has been appointed superintendent of the Champion mill. Good progress is being made.

A duplicate of the present hoisting plant has been ordered for No. 5 Tamarack, which is soon to be the deepest mining shaft in the world. The drum of the hoist is twenty-five feet in diameter and carries a mile and a nuarter of inch-and-a-half steel cable, and can hoist ten-ton loads at a speed of about forty miles an hour. Recent developments at the Arnold show

miles an hour.
The Lake Superior Concentrating Company

miles an hour.

The Lake Superior Concentrating Company has erected a sludge mill on the Franking sands and will rework the tailings for the copper known to be carried. The mill is a sduplicate of the numerous sludge mills which have so successfully reworked the tailings of the lead and zinc mines of the Jophin-Galena district of Missouri and Kansas Experimental tests were made here last season with encouraging results.

The Adventure is now installing a Rand air compresser weighing nearly 150 tons, which is to supply air for sixty drills. No 4 shaft of the Adventure, east of Adventure Gap, has finally struck the ledge, after passing through a very heavy overburden of sand, and a crossout is now being sent in the direction of the Butler lode.

Two opinions are held as to the whereabouts of the great Baltic lode north of No 5 shaft of the Baltic. The opinion more generally accepted is that the lode makes a sharp swing to the north, and that the northern extension will be found in Section 18, owned by the Atlantic, but there is a minority opinion that the lode continues parallel with the eastern sandstone, and but a short distance to the west thereof. The facts in the case will be determined by developments.

CALIFORNIA.

CALIFORNIA. San Francisco, April 22—The Oneida mine in Amador county is a good illustration of what is being done by mining managers of California to cheapen all processes. Electricity has supplanted the old and costly methods of steam power and now oil is being introduced for fuel, which will cause another

introduced for fuel, which will cause another arge saving
At the Kennedy mine on the mother lode oil is being used as fuel. The new shaft is be be sunk to the 3,000 or perhaps to the 3,500 foot level. Recently very rich blue gravel has been found at great depths along this shannel of an old river bed.
Since the old channel was struck in tha binder o mine at Yantree Hill four weeks go daily clean-ups have been made running nto the thousands. The mine was once abandoned, but this strike shows that it will rield a fortune to the men who had faith in it. The Dutch mine at Amador is showing up ore almost identical with that in the rich shutes of the Utlea mine at Angels Camp. In early days the upper levels produced argely, but all experts declared the mine was worked out as prospecting on lower levels failed to show any rich ore
The Golden Jubilee quartz mine on Coffee Creek, Trinity county, is now ranked among the big producers of northern California.

The Golden Jubilee quartz mine on Cones Creek, Trinity county, is now ranked among the big producers of northern California. The Coffee Creek district sprung into great otoriety several years ago through the discovery of several rich gold pockets, one such deposit yielding \$14,000 and another 10,000. But the quartz mines, though not giving sensational returns, have been the treadlest producers.

NEVADA.

COPPER PORTS ARE OPEN. has arrived and has let contracts for humber. holders in the Chairman mine at Ely Nev. has arrived and has let contracts for lumber, grading and construction of the new mill. Recently a fine ore body was struck on a drift on the 200-foot level. This body has been blocked out from the 100-foot nearly to the 300-foot level, and it is estimated that 125,000 tons are in sight, enough to keep the new mill running for three years. It averages from 86 to 370 ton. In running the 200-foot drift a large body of very rich copper ore was found. The Chairman is now regarded as the largest producer in Nevada. Nuggets ranging up to 3100 are being taken from the Osceola placer mines in white Pine county, Nev., which are miles in extent. Last season \$1,260 was taken from a small piece of ground in one of the guiches on this mine and the year before \$2,100.

The Rocco Homestake mine near Fureka has just been inspected by Expert P. J. Donohue of Salt Lake, who reports that \$140,000 in lead carbonate ore is in slight. Assays show 66 per cent. lead, 12 ounces silver and 20 cents gold a ton. The company clears \$30 per ton.

At the Ne Plus Ultra, adjoining the Rocco Homestake, a strike of rich lead ore was made recently. The ore was found in a drift at a depth of 125 feet. It carries some silver. Twenty tons have been taken out and the vein is steadily increasing.

The mineral output of Washoe county this year will exceed the yield of agricultural products for the first time. One of the richest districts is Olinghouse Cañon, where ore has been struck that goes \$10 to the pound. The ore is principally quartz. In the Slip mine the rich ore vein is eight inches wide, and the lead vein is five feet wide. The Reno Star mine is producing from ten to twenty tons of \$100 ore daily. All through the county old mines are being reopened and new strikes developed, so that the total product for this year will surprise all except experts.

At Sieamboat several good strikes have been made lately. This was a famous min-

axperts.

At Steamboat several good strikes have been made lately. This was a famous mining camp twenty-five years ago, when Steamboat Springs was the favorite resort of Comstock millionaires. LAKE REGION IRON MINES.

DULUTI, Minn., April 2 —Three mining properties on the Mesaba Range are being examined for purchase by Jones & Laughlins of Pittsburg at \$2,250,000. They have cost the present owner \$460,000 and the ink is hardly dry on his purchase agreements. The Great Western mine, Crystal Falls, will sink another large shaft in the foot wall, and will rush it down at once in hope of getting ore out next winter.

Lamont mine is being unwatered by Corrigan, McKinney & Co. and it will be mining in May.

Options on 12,000 acres of lands on the Western Mesaba have been given by T. B. Walker of Minneapolis to Duluth mining men and will be explored at once. There are no valuable finds in that part of the region, but it is hoped that ore of paying quality may be discovered.

No. 2 shaft, Spruce mine, has been closed till navigation opens, as its stock pile ground has been very much crowded and no more ore can be stocked. The shaft had 200 men at work.

All the Mesaba and Vermillion mines are at work and shipping to dock, and the Duluth

All the Mesaba and Vermillion mines are at work and shipping to dock, and the Duluth and Iron Range road is moving about three hundred cars of ore daily. Other roads are also moving much ore and shipments by lake have commenced from Escanaba. The engineers' strike is delaying most lake shipments and few vessels are moving.

The old Ashland mine, Gogebic range, that was abandoned by the Rockefeller company some years ago to the fee holders, has been reopened by them, and new deposits of ore have been found that make the mine very large and valuable. It is employing now 651 men and will this season ship 251, 101 tons of ore on which there should be a profit of at least \$1 a ton.

Treson, April 1.—The product of the La Fortune for the year 1900 was \$1,228,000 in gold, not a bad showing for an Arizona mine. The Turquoise mines of Mineral Park give promise of being the leading properties of the West. In addition to the Haas property that has been a steady shipper of gems for many months, the Kay mine joins in as a shipper, and the Conkey & Rawl property s opening test blue clay.

It is said that a mining man from Cripple Creek made a cash offer to George B. Upton and partners of \$250,000 for their new mine in Black Rock district, but the offer was refused. of ore on which there should be a profit of at least \$1 a ton.

The United States Steel Corporation has abandoned the \$9.53.(1) option it held on the mines of the Cleveland Cliffs company at Ishpeming, and the company will remain independent. It is now running five drills in ledge at its new Negaunce finds and expects to open a mine there at once

Work at the conglomerate shafts of the Franklin Junior is being pushed actively, and the shafts on that lode will soon be supplying a large proportion of the copperbearing rock stamped at the new mills.

Construction and equipment is proceeding at satisfactory speed in the new mill of the Mass. From present indications it will be possible to start the first stamp about July 1, and a second within a few months later. Underground the mine is showing a larger amount of heavy copper in a greater number of different openings than ever before in its history.

The Adventure has recently made another good shipment of mass and barrel copper to the smelters. The Adventure and Mass are located in the same district and carry the same lodes and the former has a couple of extra beds, the Champion and North Butler, which have not yet been located in the Mass mine.

The Adventure shafts of the Montana is rapidly coming to the front as a copper producer. A shaft has been sawe witching in the same vicinity is another promising property in the new copper district. A shaft has been sunk 160 feet to a 27-foot vein, which is mineralized throughout, carrying 4 to 5 per cent. copper and \$4 to \$5 in gold.

A good showing of copper has also been made in the Ruby C., which is being rapidly developed.

A rich gold strike has been made in the Agout the Ruby C., which is being rapidly developed.

A rich gold strike has been made in the Agout showing for the ore shoot a rich streak of gold was found at a depth of only sixty feet. Camp and is preparing to theroughly develop them. Excellent surface showings are made. MONTANA dison, the pioneer is rapidly coming producer. A shaft tain View property ast crosscut a vein struck in the contrainte. It has six r cent. copper and the best showings owned in Butte, vicinity is another new copper district, teet, and a crosscut vein, which t, carrying 4 to 5 to get in a contrainte and a crosscut copper district, teet, and a crosscut copper district, the copper district, the copper district, the company is shipping ore to the company is shipping ore to the company is shipping ore to the copper mine. Fin letter 4 Harvey are still shipping ore to the company is shipping ore

gold was found at a depth of only sixty feet.

Gotifreid Kruger of Newark, N. J. has acquired several copper properties at Copper Camp and is preparing to thoroughly develop them. Excellent surface showings are made.

IN THE BLACK HILLS.

DEADWOOD, S. D., April 24.—The American Mining Company is about to open up lower quartzite in the Ragged Top district west of this city. The surface of this district is very rich in ore shoots, some of the largest of ground. As fortune would have it the

of this city. The surface of this district is very rich in ore shoots, some of the largest in the Black Hills being worked by the Spearfish Mining Company. It is the theory that on the lower quartzite level, ore shoots will also be found as in adjoining mining districts. There is good reason to expect that mining operations along the Homestake belt will be unusually lively this senson. The Crosby-Ehrich syndicate of Colorado Springs, Col. is making the first attempt at finding the the extension of the Homestake lode on the south, but other big companies are planning to follow.

WASHINOTON.

SEATTLE April 22—Placer mining in Snoho-

view of the wonderful developments resulting from the discovery of the little fissure vein of mohawkite at the Mohawk mine the promising fissures will hereafter receive careful attention at the various mines in which such seams may be found.

In the early days of Lake Superior copper mining the fissure veins were exploited solely to the neglect of the amygdaloids and conglomerates, while for the past quarter century the latter have been sought and the former neglected. That the fissures are peccasionally of great value is evidenced by the Central mine, with a dividend record of nearly \$2,000,000, and the Cliff, which paid more than \$2,500,000 from a single fissure vein.

Recent developments at the Arnold show. TO CHECK THIEVING CABMEN. Hack Owners' and Drivers' Association Has

Devised a Plan to Effect This. The Public Hack Owners' and Drivers Association held a meeting last night at their headquarters. Sixth avenue and Thirty-

first street, at which fifty new members were

admitted and the plans were perfected for

the association's parade on Wednesday.

By this parade the hackmen expect to show

citizens that they are not a lot of highway-

men. The fact that some hackmen over-

charge their fares has given the public the

TWO HIT IN A STREET SHOOTING.

Boy Didn't Know Who Shot at Him or Why,

but the Police Found Out. Fred Vetters, 12 years old, was shot be-

hind the ear yesterday afternoon while stand-

ing in front of his home at 512 West Thirty-

eighth street. The boy heard the report

of a pistol, but he did not know where the

shot came from. Detectives of the West

Thirty-seventh street station learned that

there had been a shooting scrape at Thirty-

there had been a shooting scrape at Thirtyeighth street and Tenth avenue, which is
near young Vetter-'s home, and they arrested Frank Waish, a deiver of 340 West
Thirty-sixth street, who was pointed out
to them'as a participant.
Waish said that while at the corner he
saw John Miller, an old enemy, coming down
the avenue with three friends. He said he
saw Miller reach for his hip pocketand thought
he was going to shoot him. Just then, Waish
said, some one handed him a pistol, and he
fired three threes at Miller. He is sure that
two of the bullets struck the man, but thinks
the third one went wild and hit young Vetters. The boy was only sight y ingred.
After the shooting, Waish said, Miller's
friends took him away.
The police learned that a man was treated
at Roosevelt Hospital for a bullet wound
a little while after, and they believe he was
Mil er. He had not been found at midnight.

Vice Society to Raise \$300.000.

The members of the New York Society for

a cubic yard. Nuggets worth from \$2 to
\$15 have been picked up, and the gold is
generally coarse.

New York capitalists are examining the
May Creek and Norway group of mines,
adjoining the Copper Bell, Index district,
with a view to purchasing the two groups
and consolidating them. They also desire
to secure the Copper Bell group of thirteen
claims, should the Montana people fail to
take up the option.

The Edison mine has made another strike,
fourth since last fall. This one exposes
thousands of tons of copper-gold ore running from \$25 to \$200 a ton, and demonstrating
the property to a depth of 500 feet.

The Garager group of copper-gold claims
near Mineral, Silver Creek district, was purchased last week by New Jersey men, who
have come out with the purpose of opening
up the property. The surface showing is all
that could be desired, and it remains for
them to demonstrate values at depth.

In Lake Chelan and Methow districts a
great deal of development work is under way
and ore is accumulating on the dumps. A
smelter with a capacity of several hundred
tons a day is under contemplation on the
banks of the Columbia River at Chelan Falls.

BEITISH COLUMBIA.

charge their fares has given the public the wrong impression, they say, that all hackmen overcharge, and it is to wipe this out that the organization was organized. Moreover, the business is not as profitable as it used to be, because of this overcharging.

"We want to gain the confidence of the public to a greater extent than we have it now," said Trensurer Brown last night. "We went allow any overcharging by our members. After the parade all our members, of whom there are nearly 1,000, will place on the bridles of their horses resettes with red, white and blue streamers. Those are our colors and we want the riding public to become acquainted with them.

"If a cabman having our colors overcharges a passenger complaint may be made in writing banks of the Columbia River at Chelan Falls.

BRITISH COLUMBIA.

SEATTLE. Wash, April 22—The Mount Secker mines on Vancouver Island are new giving employment to over 100 men and are shipping from 70 to 100 tons daily to the Tacoma smelter on a long-time contract. The mine has paid from the grass roots.

Seattle men have secured an option on the Dorothy group of gold mines on Tuxeda Island, located one mile from the Van Anda smelter. This is a property showing two well-defined veins of free milling gold ore which assays from \$100 to \$1,000 a ton.

NEWFOUNDLAND. "If a cabman having our colors overcharges a passenger complaint may be made in writing or in person to our headquarters, giving the circumstances and the license number of the cabman. We will investigate the complaint and if it is well founded will dismiss the offender from 'qur organization and take means to have his license revoked. By sticking to the legal rates of fare we hope to increase our patronage and feel sure that we will do so."

NEWFOUNDLAND. MONTREAL, April 24. - An important mineral MONTREAL A pril 24 — An important mineral discovery is reported from Newfoundland. A few years ago the discovery of the famous iron deposits on Belle Isle, Conception Bay, was made. News has now been received of the discovery of large deposits of manganese of the best quality on the south shore of Conception Bay, directly opposite Belle Isle. The Dominion Iron and Steel Company intends to open up the property. The deposit is said to extend several miles along the shore and to be of considerable width. As manganese is a valuable alloy with iron in the manufacture of the finest steel the discovery is expected to add immensely to the value of the iron property on Belle Isle and will be of great importance to the Sydney value of the iron property on Belle Isle and will be of great importance to the Sydney Iron Works.

SALT LARE, April 22.—Utah has done well in dividends this month. The contributions are: Utah Consolidated (Highland Boy), \$375,000; Consolidated Mercur, \$125,000; Silvet King, \$100,000; Centennial-Eureka, \$50,000; Daly-West, \$45,000; Mammoth, \$5,000, Rocco-Homestake, \$4,500; total, \$704,500 The South Swanses, Annie Laurie, Quincy, Anchor, Ontario, California, May Day and numerous UTAH

isth. R. S. Ransom. | Math. J. H. J. Renner.

Ted Marks is one of the committeemen from the Twenty-fifth, and Manny Friend is a member of the committee in the Thirty-first. When Tammany men were asked about the movement last evening they said that it did not worry them. Said one of the Tammany district leaders when his opinion was asked:

"Say, there ain't a man in that outfit who hasn't got the Larry Delmour ear at one time or a nother."

It seems that Mr. Delmour has one deaf ear, which officeseekers are likely to find turned toward them.

BAPTIZED IN THE HUDSON.

over six feet, the sink covering a full acre
of ground. As fortune would have it, the
miners were all at lunch and no one was injured except a teamster on the surface, whose
team was caught in the sink. Just how
badly the property is injured cannot be told
at this writing. It would seem to be a very
serious matter.

ALASKA.

VICTORIA, B. C., April 27.—According to news received by the steamer Amour, the work of "cleaning up" the Klondike began on April 18 and hills and creeks were alive with men, a thaw having given the miners a full head of water. Those who have made investigations on the various creeks and pulches report that this season will excel the past ones and the output will not be less than \$25,000,000. Some estimate it as high as \$30,000,000. These estimates, of course, include the gold that will be acquired by summer workings.

Eight Colored Men and Five Colored Women Immersed at Husted's Beach.

TARBYTOWN, N. Y., April 28.—Husted's Beach contained fully 3,000 people this afternoon who had assembled to witness the baptism of thirteen colored people. The water in the Hudson is still quite cold, but each convert stepped into the river boldly. The services were held at 4 o'clock and the Rev. W. H. Taylor, pastor of the Shiloh Baptist W. H. Taylor, pastor of the Shiloh Baptist Church, and the Rev. G. W. Bailey of New York officiated. There were five women and ork officiated. There were new women and eight men in the party. The women wore white gowns. The two ministers took their station about fifteen feet from shore and the converts one by one were led forth by Eider Dabney. This was the signal for a hymn and the whole assemblage joined in. The ministers then clusped the convert tightly and placing his hands across his breast would say.

"I baptize thee in the name of the Father, the Son, the Holy Ghost, one God." With this the convert was immersed and as he arose he raised his hands and clasped them arose he raised his bands and clasped them together several times. One woman was so affected that she had to be carried ashore. The police were on hand to prevent any trouble or annoyance by roughs

Funeral of Mrs. Elisha B. Gaddis.

The funeral of Mrs. Mary A. C. Gaddis, who died at her home 1016 Broad street, Newark, on Thursday night, will be held this afternoon. Mrs. Gaddis was the wife of Elisha B. Gaddis, head of the firm of Wilkin-Elisha B. Gaddis, head of the firm of Wilkinson, Gaddis & Co., Vice-President of the North Jersey Street Railway Company and a prominent factor in Pennsylvania Railroad and the New Jersey Gas and Electric Light companies. The honorary pullbearers will be United States Senator John Kean, James Sndth, Jr., P. Sanford Ross, William Stainsley, Dr. Leslie D. Ward, Dr. F. B. Mandeville, William L. Thompkins, Frank L. Sheppard, E. F. C. Young and John F. Shanley.

pitals for the Supposed Insane. Charities Aid Association to the State Commission in Lunacy contains more praise and congratulation than criticism, and bolsters its the phraseology of desperation. The association says of the reports of its visitors:

State Charities Aid Suggests Reception Hos-

made in the hospitals during the past year; they deplore the continued overcrowding and mainly of the evils caused by overcrowding-a condition we have reason to believe have been attained upon which we desire to congratulate the commission and the public.

matter of hospital accommodation, but as the increase in the number of insane in this State is more than 700 a year this is something of a problem. There are now or were on Oct. 1, 1900, 23,778 insane persons in the State hospitals and private institutions. The report says on this score:

"That there should now be over 22,000 dependent insane persons in this State, with an increase of insanity which, in ratio, exceeds the increase of the population of the State, is an appalling fact. One asks one's self:
Where is this to end? How many of these how hopeless cases could have been saved by skilful medical treatment before commitment? Why should not the insane have the benefit of the best medical skill our country affords, and which is now so freely given gratuitously by the most distinguished members of the profession to patients suffering defrom other diseases in other hospitals of every city of this State? Indeed, we have been assured by several of the most eminent neurologists and alienists of New York city that they will gladly serve as attending and econsulting physicians, if a reception hospital for the insane can be established at some accessible location.

The wedding.

"Hire a hall," said the Broadway squad, so he did.

Miss Fitzmaurice lives at 828 Eighth avenue and it was from there the bridal party started at 6 o clock. Daly wore a frock cont and tall hat. The bride was in white and was attended by Miss Lizzie Seymour of Orange, N. J. Peter F. Daly, a brother of the groom, was the best man. Miss Estelie McClusky and Miss Manne Groden were the maids of honor.

The ceremony was performed at the floly the church was crowded. Then the party drove to Northwestern Hall.

STILL FIGHTING MRS. EYLER.

State Charities Aid Board Set on Investigating Her Management of Girls' Home.

TRENTON, N. J., April 28.—At a meeting of the Board of Managers of the State Charities Aid Association held in New York city yesterday Gov. Voorhees and Mrs. Eyler were severely criticised for the manage-

of this city, and other well-managed hospitals of this city, and other well-managed hospitals dask fresident physicians, and attending and consulting physicians who should be alienists and neurologists. Into the reception hospital for New York city would be gathered all cases of the committed insanity, as also recent cases of the committed insanity, as also recent cases of the committed insanity and here they should be examined and classified by the attending physicians before being treated either within the wards of the hospital or elsewhere. Cases possibly curable would doubtless be kept for a limited period in the reception hospital to the courts to compel the management of the board visit the institution and make an investigation, and if not allowed to enter to appeal to the courts to compel the management of the board visit the institution and make an investigation, and if not allowed to enter to appeal to the courts to compel the management of the board visit the institution and make an investigation, and if not allowed to enter to appeal to the courts to compel the management of the board visit the institution and make an investigation, and if not allowed to enter to appeal to the courts to compel the management of the board visit the institution and make an investigation, and if not allowed to enter to appeal to the courts to compel the management of the board visit the institution and make an investigation, and if not allowed to enter to appeal to the courts to compel the management of the board visit the institution and make an investigation, and if not allowed to enter to appeal to the courts to compel the management of the board visit the institution and make an investigation, and if not allowed to enter to appeal to the courts to compel the management of the forms about changes in the mathematic part of the same and the methods by which their efforts and the methods by which their ef

Once-Convicted Man Said to Have Made \$40,000 on Bogus Real Estate Deals.

Henry Loeffler, 8 years old, a son of Charles Loeffler, a well-to-do real estate dealer in Broadway, near Myrtle avenue, Williamsburg, was remanded without ball in the Lee avenue police court yesterday pending a hearing on two charges of grand larceny. He was accused of obtaining \$1,500 by false representations from Charles W. Plummer, a truckman of 387 Pulaski street, and a like amount from Mathias Siebert, a plumber of 34

Bleecker street.

Loeffler, who was formerly in the real estate business, is a ticket-of-leave man from the Elmira Reformatory, to which institution he was committed about two years ago for obtaining money by false representations. About nine months ago he secured a paralle

tions. About nine months ago he secured a parole. It is said that he was hardly set at liberty before he again began operations. He represented himself, it is said, to have big realty schemes and, it is alleged, secured more than \$40,000. From Piummer, it is alleged, he received sums of money aggregating \$6,000 and from Siebert, \$10,000.

About ten days ago Loeffler disappeared, but was traced to Jamaica and arrested Saturday evening. When he was arraigned yesterday his lawers asked that he be released on bail, but Magistrate Kramer denied this until he could learn more of the amount of Loeffler's alleged peculations.

THE REAL THING IN BURGLARS. One Covered Servant With Pistol While Pal Ransacked the House. HACKENSACK, April 28.-Two masked

burglars entered the residence of Mrs. Rachel Hamilton at 3 o'clock this morning. While one of them sat, revolver in hand, upon the edge of a bed occupied by Julia Burns, a servant, who was alone in the house, when they entered, the other went through the rooms selecting such articles as suited his

rooms selecting such articles as suited his faircy. When the burglar had gathered what he wanted the two nen closed the door of the servant's room and tied the handle to the handle of a door across the hall. Then they left.

About noon to-day George Van Vladricken and Harry Hawkey, while walking through a small growth of timothy and brush near the hospital, found a quantity of silverware and bric-à-brac which had been taken from Mrs. Hamilton's.

Who Hit Him, and Why?

MATAWAN, N. J., April 28. - David Suydam of Perth Amboy was assaulted here just before midnight last night and is in a critical condition with a fractured skull. He was found early this morning unconscious in the street. He says he was about town last night with some companions and was seized from behind while on the way home. He twisted loose and was knocked senseless. He says he did not see his opponent. He had considerable money with him, but was not robbed.

Broadway squad and for John J. Daly, one of the 6-footers who compose it. It was maurice whose marriage to Policeman Daly was the cause of the festivities in Northwestern Hall at 401 West Thirty-sixth street, where 250 friends of the bride and groom assembled to congratulate the happy couple Dinner was served to the guests and when Chairs and tables were cleared away after the vaudeville show and dancing followed. There was a grand march with the bridal couple in the lead and their friends following. Daly has been on post six years at the Gilsey House crossing and is the hero of innumerable rescues of other people's wives. Before he joined the squad he did duty at the Immigration Bureau where he won three life-results are results.

matter of hospital accommodation, but as

tinat they will gladly serve as attending and consulting physicians, if a reception hospital for the insane can be established at some accessible location.

The plan we would advocate is the erection, in several of our largest cities, of comparatively small reception hospitals, or psychopathic hospitals, as branches of existing State hospitals, as branches of existing State hospitals, and governed by the same boards of managers. These hospitals, designed for the reception and temporary treatment of insane patients, should be organized on the same general plan as are the New York, Presbyterian, St. Luke's, St. Vincent's, Roosevelt and Mount Sinai hospitals of this elly, and other well-managed hospitals of this elly, and other well-managed hospitals staff, resident physicians, and attending and consulting physicians who should be allowed.

The committee say they will carry the case to the Court of Errors and Appeals if neces-

WILL EXJOINS SONS TO SORRIETY. B. H. Booth's Daughters-in-Law Will Get His

Money if Their Husbands Drink Too Much. RIVERHEAD, L. I., April 28. - The will of Barnabas H. Booth, President of the Southold Savings Bank, was admitted to probate yesterday by Surrogate Petty of Suffolk county. Mr. Booth lived at Southold and county. Mr. Booth lived at Southold and left an estate valued at \$45,000. The widow rece ves \$40 quarterly from the income, and the remainder is divided equally among a daughter and two sons. On the death of the sons the estate is to be divided.

One provision of the will reads:
"And in case, in judgment of my executors, my sons Horatio or Irwin or both of them fail to keep soher, or become strongly addicted to drink, then I give my executors power in their discretion to pay the whole of their incomes to their wives."

GENESEO, N. Y . April 28 -A disease which several veterinarians have diagnosed as diphtheria is prevalent among the horses of farmers living between this village and Conesus Lake. The disense is of a severe form and none of the horses which have been attacked has recovered. The first horse attacked belonged to John Hanby, who lives a large share of the trade. of farmers living between this village and form and none of the horses which have been attacked has recovered. The first horse attacked belonged to John Hanby, who lives near the shore of Conesus Lake. The horse and three others which belonged to Hanby have died. John J. Demorest has lost two horses, matched road animals, for which he had refused \$750. Eight other horses, worth about \$1,100, belonging to various worth about \$1,100, belonging to various farmers, have also died.
